ANGKA-TAN MOTOR SDN BHD (85810-A)
A subsidiary of Warisan TC Holdings Berhad 华南山陈帽子公司

Angka-Tan Motor Sdn Bhd (ATM) is a subsidiary of Warisan TC Holdings Berhad (WTCH) with a decade of experience in sales and distribution, assembly, and parts distribution in the automotive industry. Leveraging on their existing comprehensive network and experienced manpower, ATM takes lead as the sole distributor of Vigus Pro in Malaysia.

Jiangling Motors Co. Ltd. (JMC) is one of the established vehicle brands in China and a manufacturer of a leading American automobile company. JMC sets the standard on quality, safety and technological advancement with their constant pursuit to fuel growth. With a long history of producing industrial and commercial vehicles, JMC continues to enrich its product line-up which has led to its recent venture into SUVs.

Vigus Pro

WHITE SERIES

The Vigus Pro White Series presents you a vehicle that provides you the best of everything essential, all at an affordable price. Curated to an ever increasing competitive business landscape for corporates, fleet owners, and small to medium enterprises (SMEs) - the Vigus Pro White Series offers unrivalled value with key solutions to perfectly match your drive, serving as Your All-Essential Workhorse!

Vigus Pro

PREMIUM SERIES

The Vigus Pro Premium Series is the epitome of luxury and performance. Meticulously designed to cater to discerning tastes, this extraordinary series redefines comfort and efficiency, conquering even the most challenging tasks with ease. Rain or shine, smooth or rough, the Premium Series is bound to elevate your rides from here on out.

Vigus Pro

WHITE SERIES 4X2

The Vigus Pro White Series 4x2 extends the series, offering even more affordability and improved fuel efficiency due to its lighter weight while retaining all the same features. Tailored specifically for startup entrepreneurs, this variant provides the ideal solution for those seeking a pickup truck without the necessity for 4WD capability.

ALL READY. ALL BEAST

Drawing inspiration from the muscular physique of a tiger, we studied the anatomy of the predator and morphed it into the design philosophy of the JMC Vigus Pro, which revolves around channeling its power and dominance into every aspect of the exterior. From the muscular lines on the hood to the sleek contours along the sides and rear, every detail is designed to evoke the strength and agility of this majestic predator.

This is JMC Vigus Pro.

FORGET HORSEPOWER LET'S TALK TIGERPOWER

Beast on the outside, mean machine on the inside. Underneath the hood lies the heart of the Vigus Pro - a PUMA 2.0L TDI diesel engine that optimizes for a better performance by adjusting based on driving conditions. Coupled with the class-leading ZF 8-speed auto transmission with manual mode, it provides smooth and efficient drives.

POWER
141 PS
3,600rpm
TORQUE
340 Nm
1,500-2,600rpm

EXCELLENT FUEL EFFICIENCY
7.8L/100km*

Bosch High Pressure Common Rail

Driving on undulating terrains and off-road means that the surface is constantly changing. The Bosch High Pressure Common Rail advanced technology analyses the driving conditions and accurately adjusts the fuel injection to an optimal point resulting in better engine performance and improves fuel efficiency.

ZF 8-Speed Auto Transmission

ZF 8-AT which is commonly found in luxury vehicles offers a manual mode option, empowering you to take full control of gear selection when needed. By keeping the engine in its optimal RPM range, the ZF 8-AT ensures quicker acceleration and more responsive handling.

BorgWarner 4WD System

For conquering particularly challenging inclines or off-road obstacles, the BorgWarner 4WD system features a low-range transfer box. At a switch of a button, this system allows you to actively choose between 2WD or 4WD depending on the road conditions to achieve maximum performance.

Puma 2.0L TDI Diesel Engine

Crafted for optimal performance and fuel economy, the robust Puma 2.0L TDI diesel engine delivers impressive torque and power across various driving scenarios. Offering remarkable power and torque for effortless acceleration and towing, while prioritizing fuel efficiency and reducing running costs.

*Based on UNECE R101 test mode.

FOR PRODUCTIVE VENTURES

Experience the epitome of reliability and efficiency with the Vigus Pro. With this versatile workhorse, every trip becomes a seamless and productive venture. Empower your next big move and go the distance with the All-Essential Workhorse, no matter the terrain.

Stronger Impact Absorption

The ladder frame chassis has a sturdy structure that is capable of withstanding various terrains, allowing better impact absorption for the safety of the passengers.

Better Durability and Load Stability

The multi-leaf suspension system ensures weight is evenly distributed for better durability, stability and load capacity.

Putting Torque Where it Matters

The Eaton Differential Lock allows torque to be shifted from one wheel to another. In a situation where the surface is uneven and one of the wheels is not in contact with the ground, torque will be shifted to the wheel on ground with traction to move.

Built for a Heavy Load

The independent double wishbone consists of lower control-arm and a reinforced stabiliser bar improves handling and a more comfortable ride.

AN INTELLIGENT BEAST

Navigate the road with peace of mind. Whether slippery tracks or a tricky descent, tight corners or unexpected obstacles, trust the Vigus Pro to steer you through for a seamless ride. Take on your journey with this intelligent beast, equipped with incredible safety features providing you with an extra edge in sight and sense.

SAFETY

Antilock Braking System (ABS)

The ABS prevents wheel lock-up during an emergency brake to safely allow you to steer away from obstacles and avoid collisions.

Electronic Brake-Force Distribution (EBD)

The EBD intelligently adjusts and distributes the right amount of brake force between the front and back wheels, to optimise braking performance with different loads.

Electronic Stability Programme (ESP)

The ESP with Traction Control System helps you to navigate through slippery surfaces when it senses drive-wheel spin by applying brake pressure to specific wheels.

Front Dual Airbags System

Dual airbags covering both the driver and the front passenger improve passenger safety.

Hill Start Assist (HSA)

When starting from a slope, the HSA intelligently holds the vehicle for 2 seconds, allowing sufficient time for the driver to switch foot from the brake to accelerator pedal.

Hill Descent Control (HDC)

Tackling a downhill challenge is more manageable with HDC by automatically adjusting your speed and brake pressure to keep you going at a controlled speed.

Four-Wheel Disc Brake

Equipped with 4 large-sized ventilated disc brakes for a strong braking force and fast heat dissipation, ensuring an efficient braking even with a heavy load.

Cruise Control

Ideal for long distance-travel, the cruise control offers the convenience of setting and maintaining your vehicle's speed within a safe range of 40 to 150 km/h.

PAYLOAD
950 KG

A WHOLE NEW WORLD ON THE INSIDE

Multi-Function Leather Steering Wheel

The leather steering wheel enables an easy operation for menu selection & Bluetooth connection while the paddle shifter allows you to change gears while maintaining hands on wheel for a more engaging driving experience.

8" Touch-Screen with Integrated Reverse Camera

The touchscreen centre console is the hub for your entertainment needs on-the-go, with a USB Port to connect or charge your device. The reverse camera is also integrated to display visuals for smarter parking.

Electronic Gear Selector

The shift knob features a modern design and allows gear changing with a simple press of a button, reducing the arm movements.

Spacious Interior Cabin

Luxurious comfort in the cabin with ample legroom and headroom, complemented by the convenience of a secret storage compartment beneath the rear seat for your toolkit.

Proximity Sensors

Smart sensors with an impressive wide sensor distance of 120cm at the middle and 60cm on both sides, with audible alerts to warn the drivers of any obstacles.

Side Mirror Heaters

Side mirror heaters clear condensation from adverse weather conditions for a safer drive.

Speed-Sensing Door Locks

Upon reaching 25 km/h, the Vigus Pro intelligently senses and locks the car doors for safety and protection.

Remote Control Power Windows and Mirrors

Conveniently raise or lower the windows, and fold the side mirrors from a distance utilizing a convenient remote control.

Auto On/Off Headlights

Eliminate the need to manually switch on or off the headlights. This smart feature auto detects low lighting conditions and will activate automatically.

Rain-Sensing Auto Wipers

Focus solely on the drive ahead and let the car automatically adjust the wipers speed based on rain density.
